

## CATHODE RECORD IDENTIFICATION

**NOTE:** This form is to be completed and attached to VA Form 134, Combination Requisition and Shipping Ticket, and returned to Somerville Asset Management Service (SAMS) along with the silver laden cathode. It will enable us to give credit to the appropriate fiscal year in which your silver was actually collected. Should you have a partially plated cathode at the close of the survey period, September, shipping costs may not justify sending the cathode to SAMS. However, if you processed at least 200 gallons of solution, and/or your cathode contains at least a 1/4" deposit on the discs, you should send this cathode in as credit to your yield for the fiscal year. (Approximately 100 troy ounces equivalent).

FACILITY		PROCESSOR TO WHICH RECOVERY UNIT IS ATTACHED (i.e., number 3 Main X-ray, Central Recovery, etc.)		
REMARKS				
DATE OF PLACEMENT	SIGNATURE	<b>SAMS USE ONLY</b>		
DATE OF REMOVAL	SIGNATURE	DATE RECEIVED	GROSS WEIGHT	NET WEIGHT
